OUR PHILOSOPHY

**Flawless design by a well experienced
team results in durability, reliability
and practicality in use.**

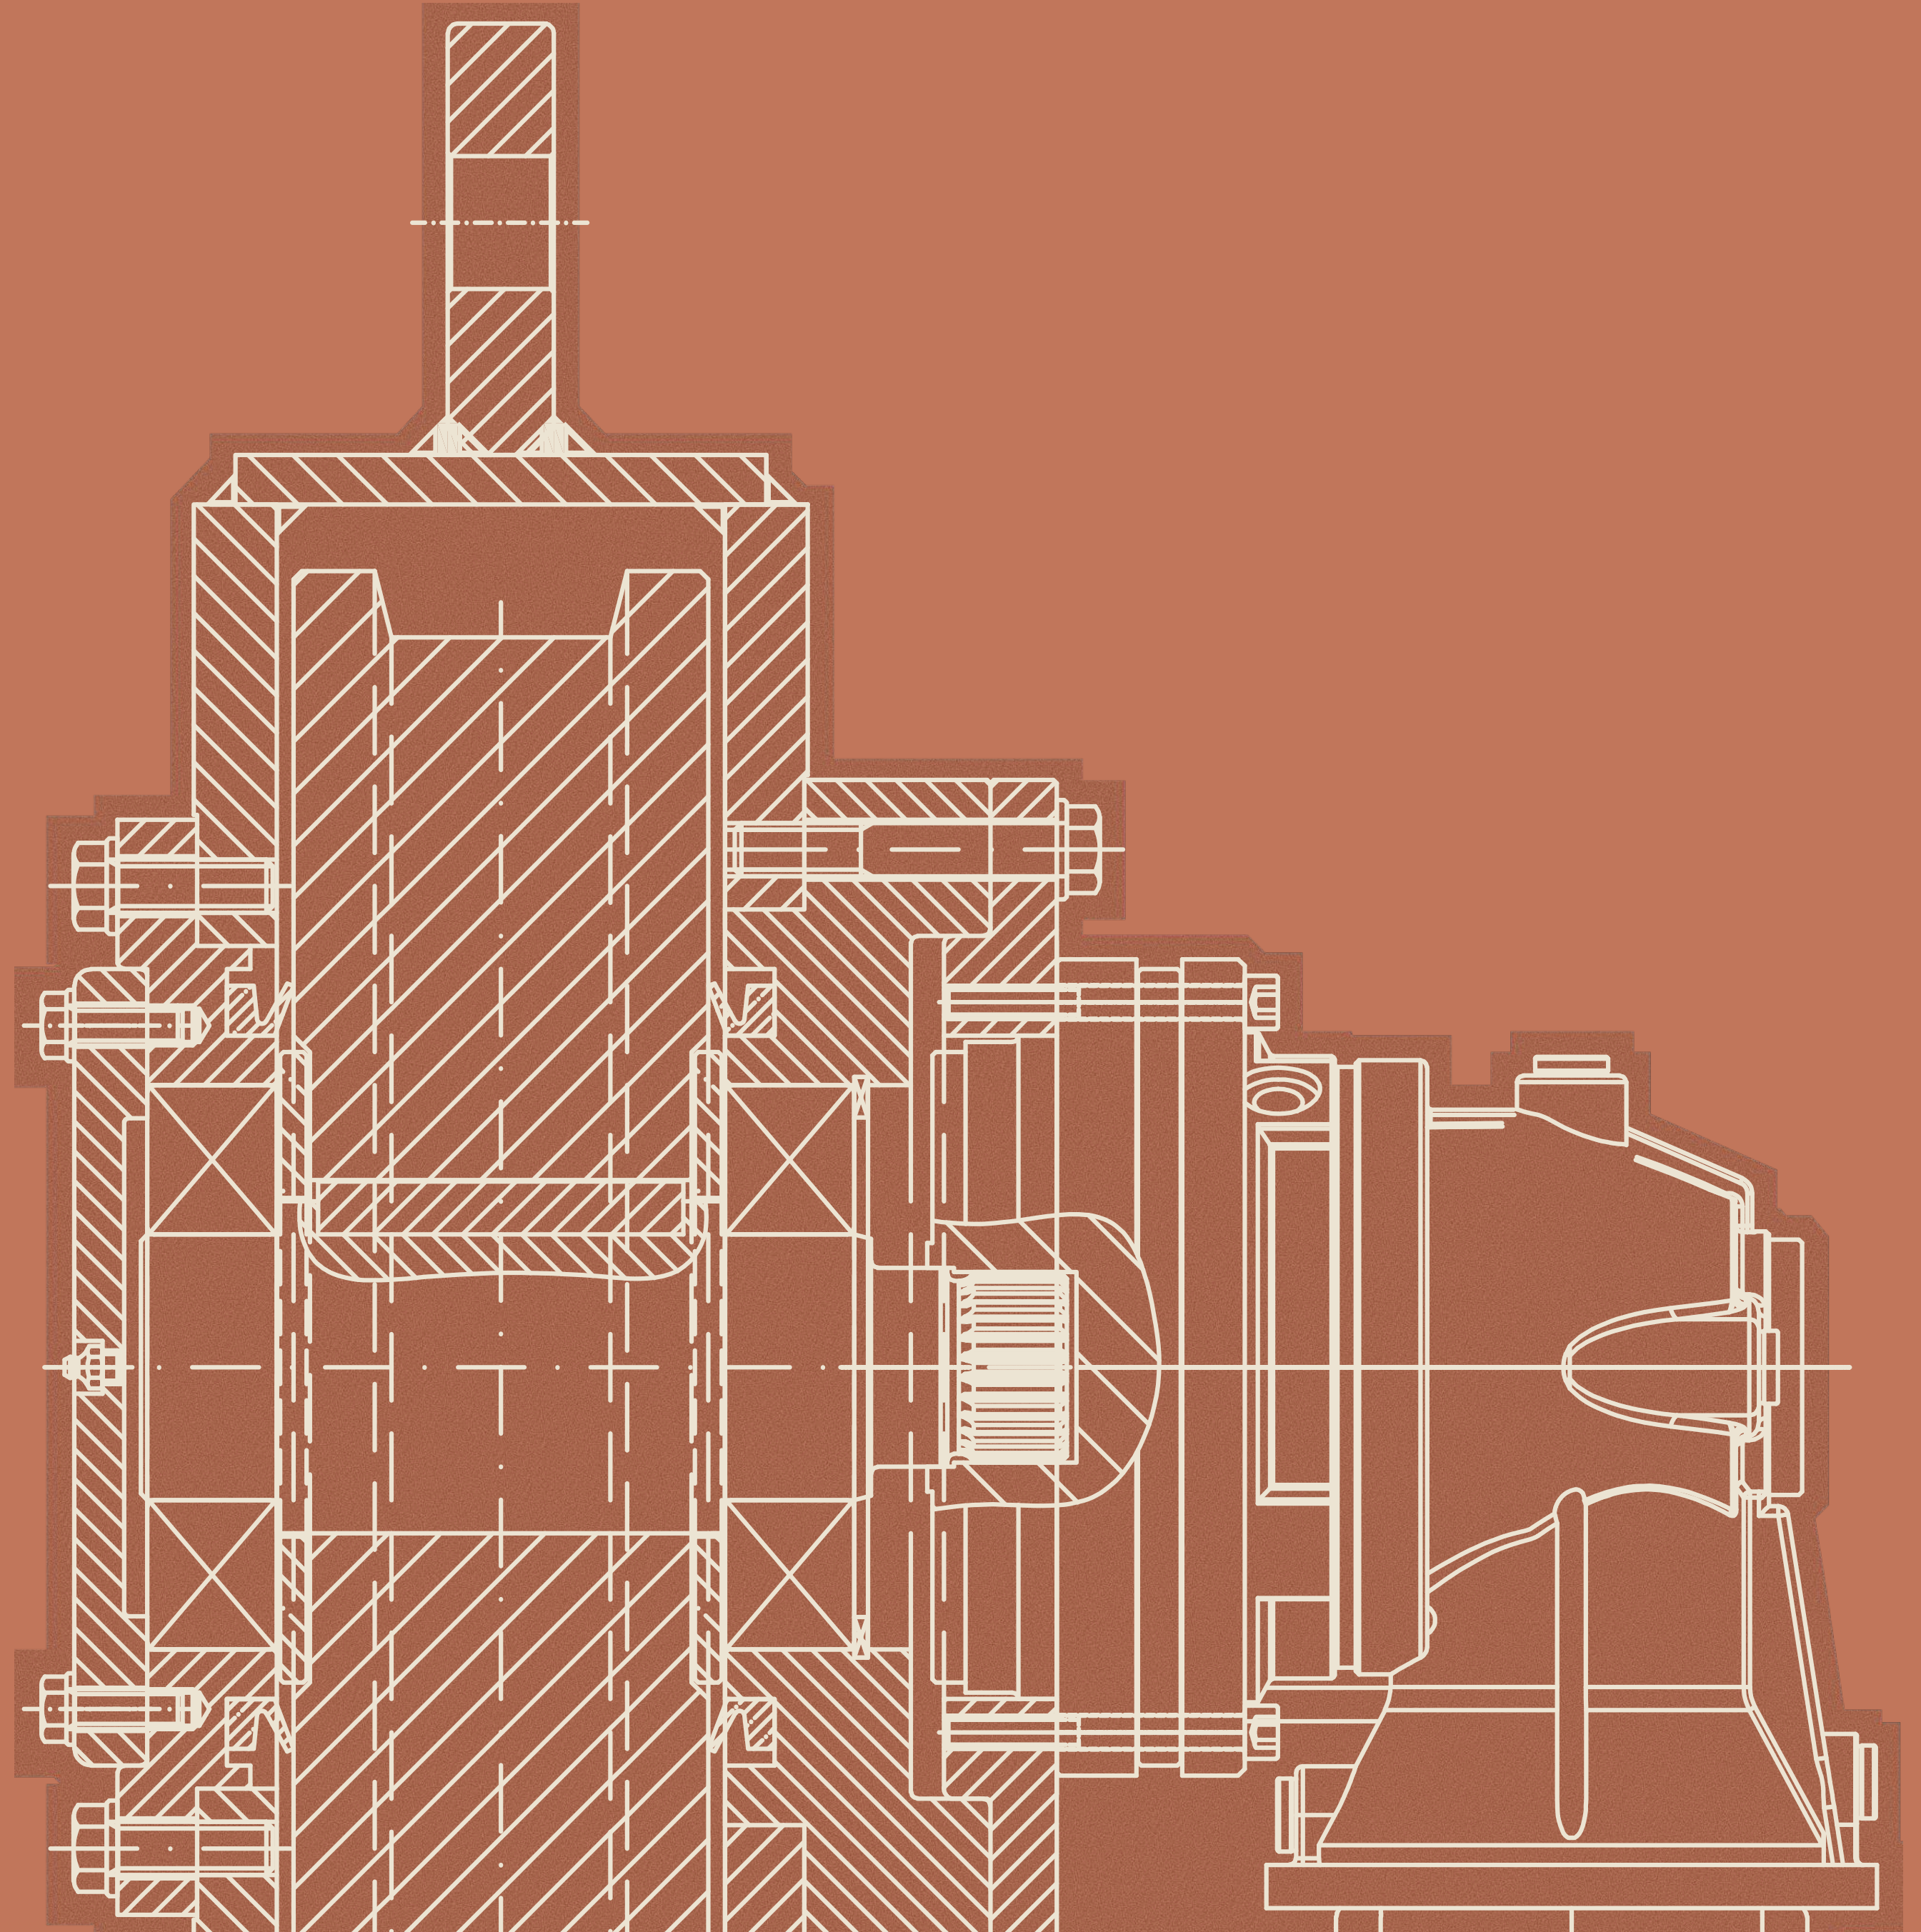

With its renewed commitment to the future and enhanced team, Mariner continues to be your dedicated partner.

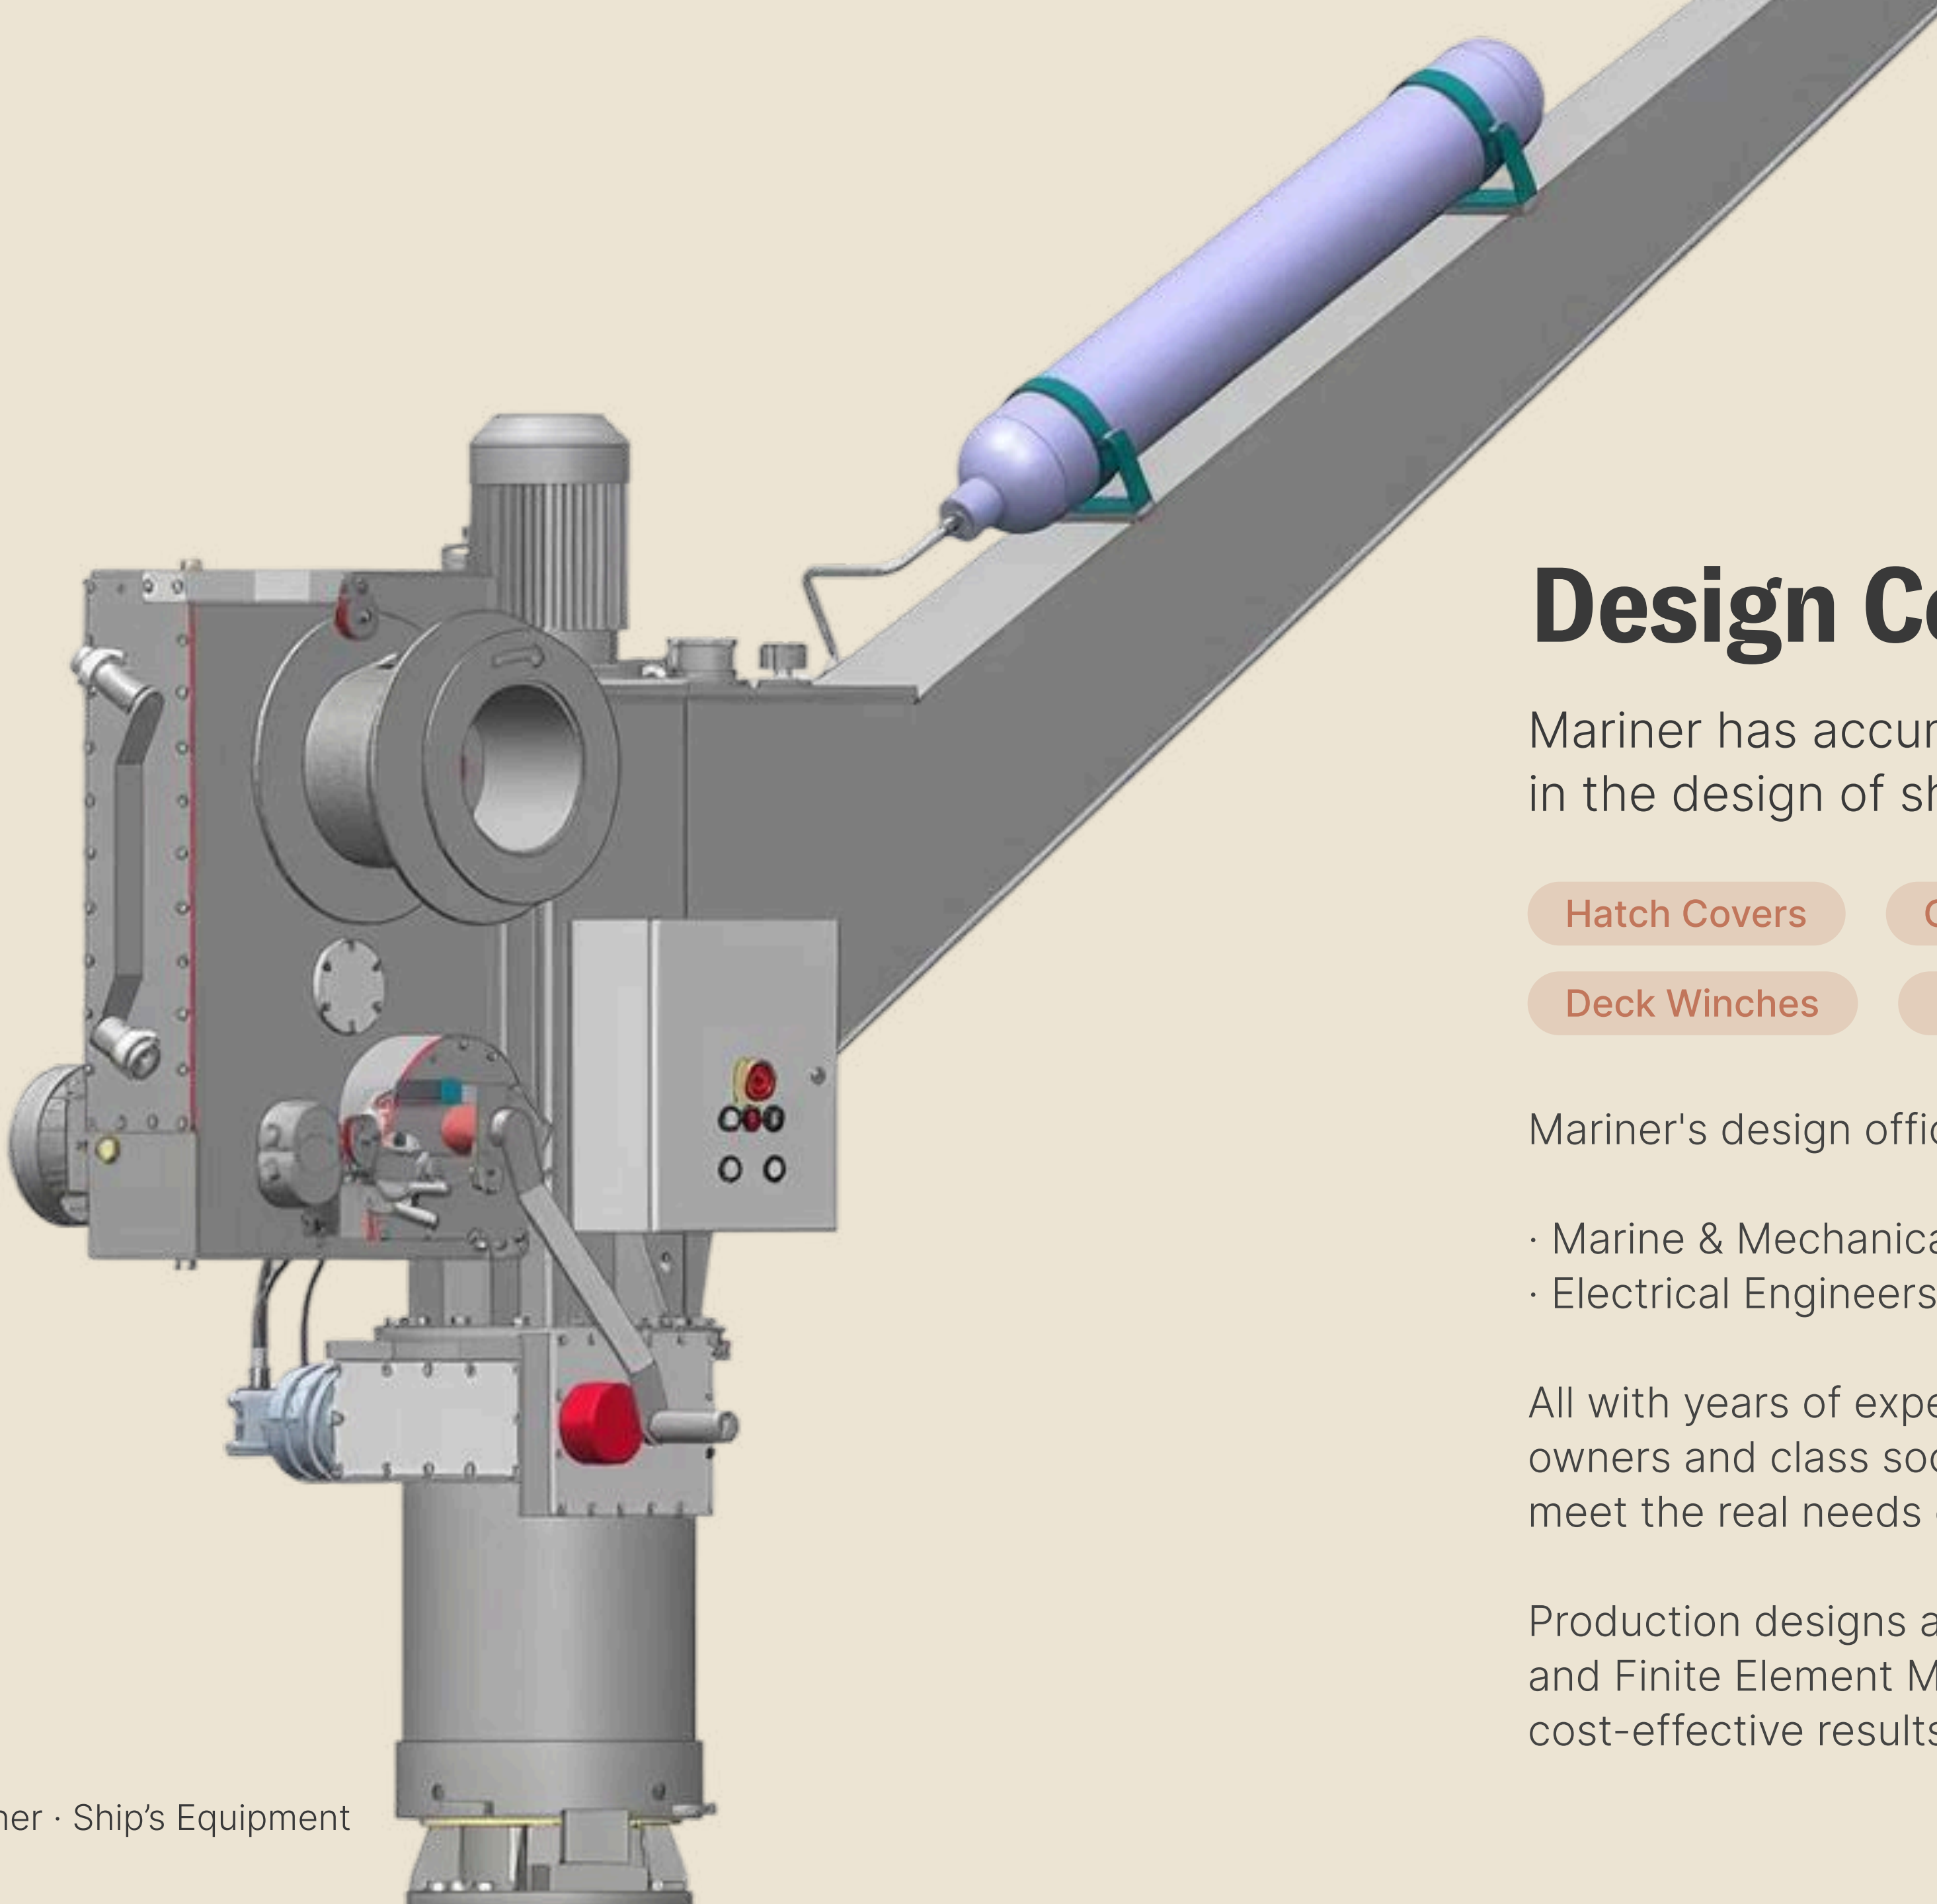

Three lines. Three promises.
Design · Product · Service

Design

Engineering solutions for
every challenge at sea.

A detailed 3D CAD model of a ship's deck crane. The crane features a grey base with a large circular opening, a motor, and various mechanical components. A long, grey boom extends diagonally upwards, supporting a purple cylindrical load held by green straps. A control panel with buttons and a red emergency stop is visible on the side of the base.

Design Consulting Services

Mariner has accumulated years of experience in the design of ship's deck equipment.

Hatch Covers

Cranes

Rudders Steering Gears

Deck Winches

Ro-ro Equipment

Mariner's design office is located in Istanbul, Turkey.

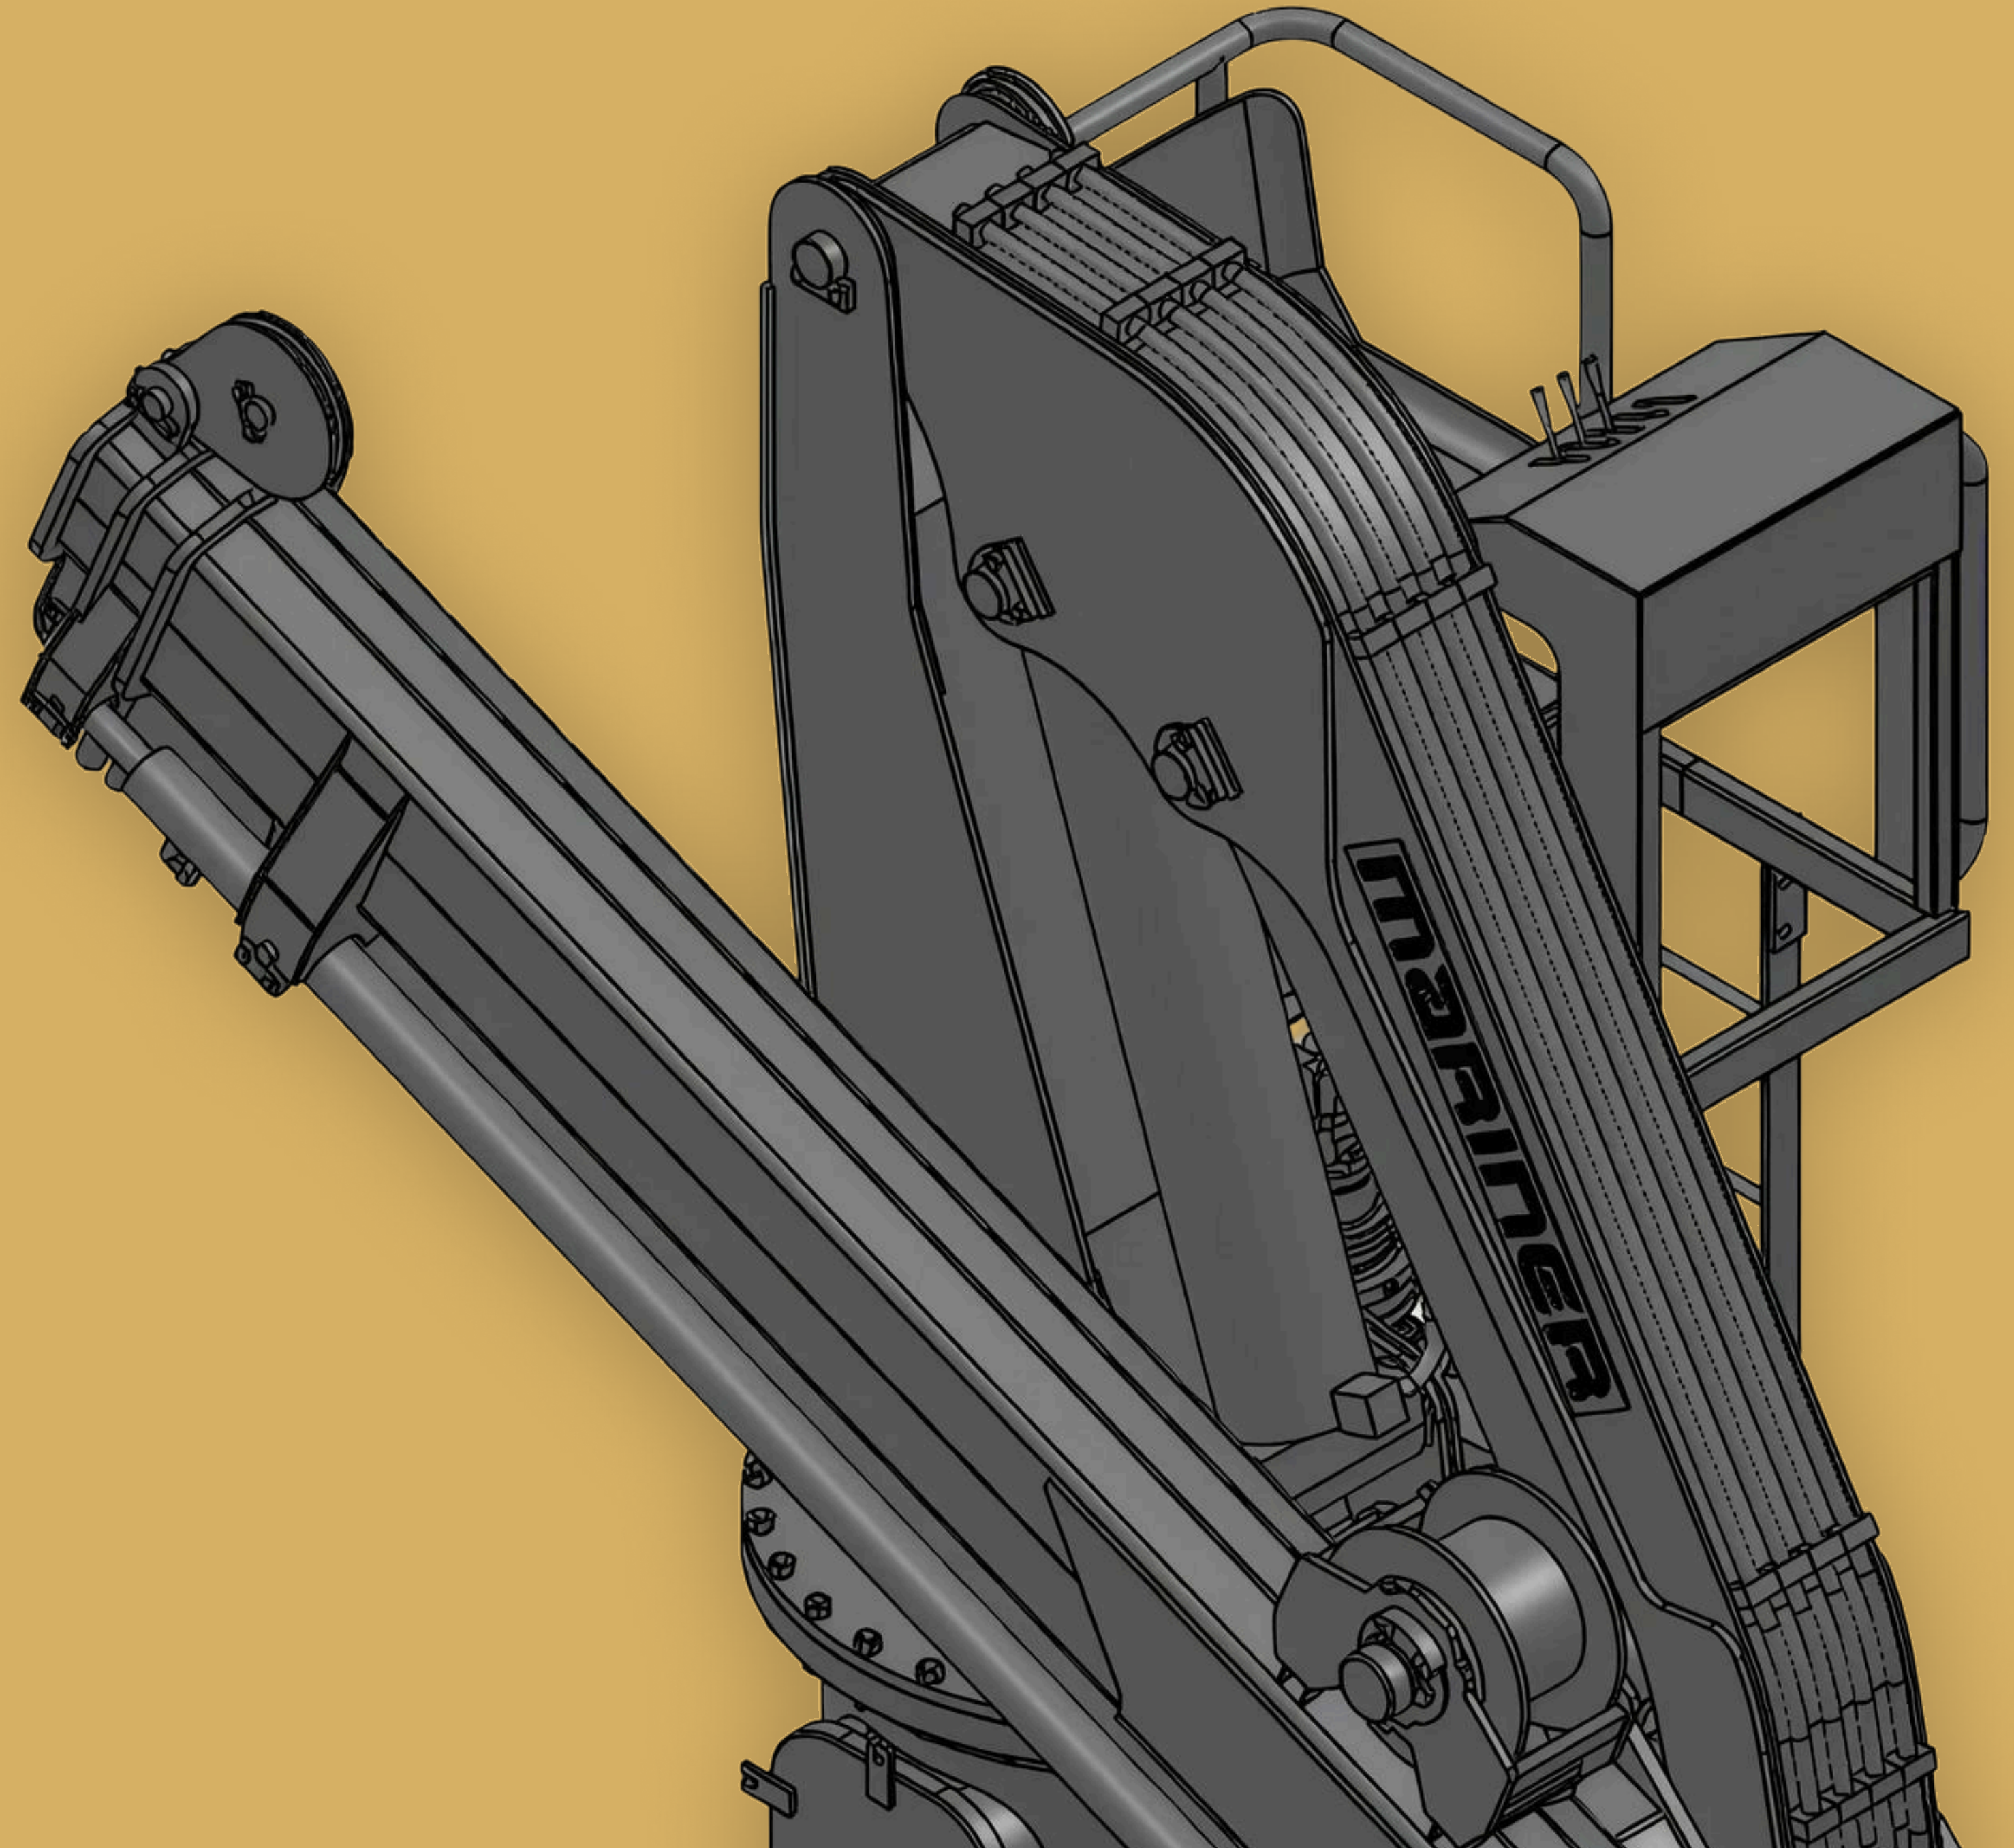

- Marine & Mechanical Engineers
- Electrical Engineers & Draftsmen

All with years of experience in shipyards, ship owners and class societies — ensuring our designs meet the real needs of the industry.

Production designs are prepared using 3D modeling and Finite Element Methods for lighter, safer, and cost-effective results.

Product

Built by Mariner. Trusted worldwide.

Rudder Systems

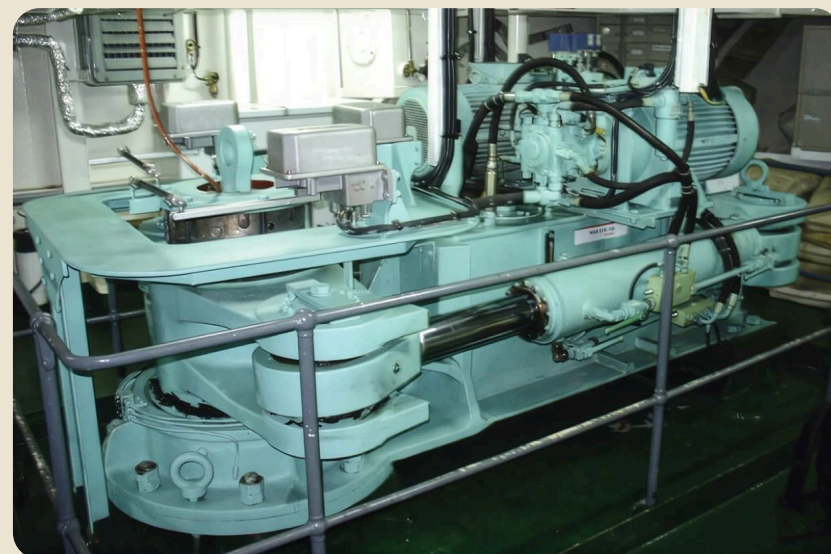

Mariner can design rudders in various different forms such as high lift flap type, spade type or other special forms that can be twisted (with or without bulb).

Mariner rudder trunks having stiffeners around them provide easy installation for the shipyard. Bronze or synthetic material neck bearing boss and propeller shaft stern tubes are also available by Mariner.

In addition to these commercial type rudders, Mariner also designs special, made-to-order rudders for fishing vessels.

Steering Gear

In addition to the rudder, if preferred, Mariner can also provide the steering gear.

Cranes

Mariner has designed a vast array of cranes for commercial, military and fishing vessels.

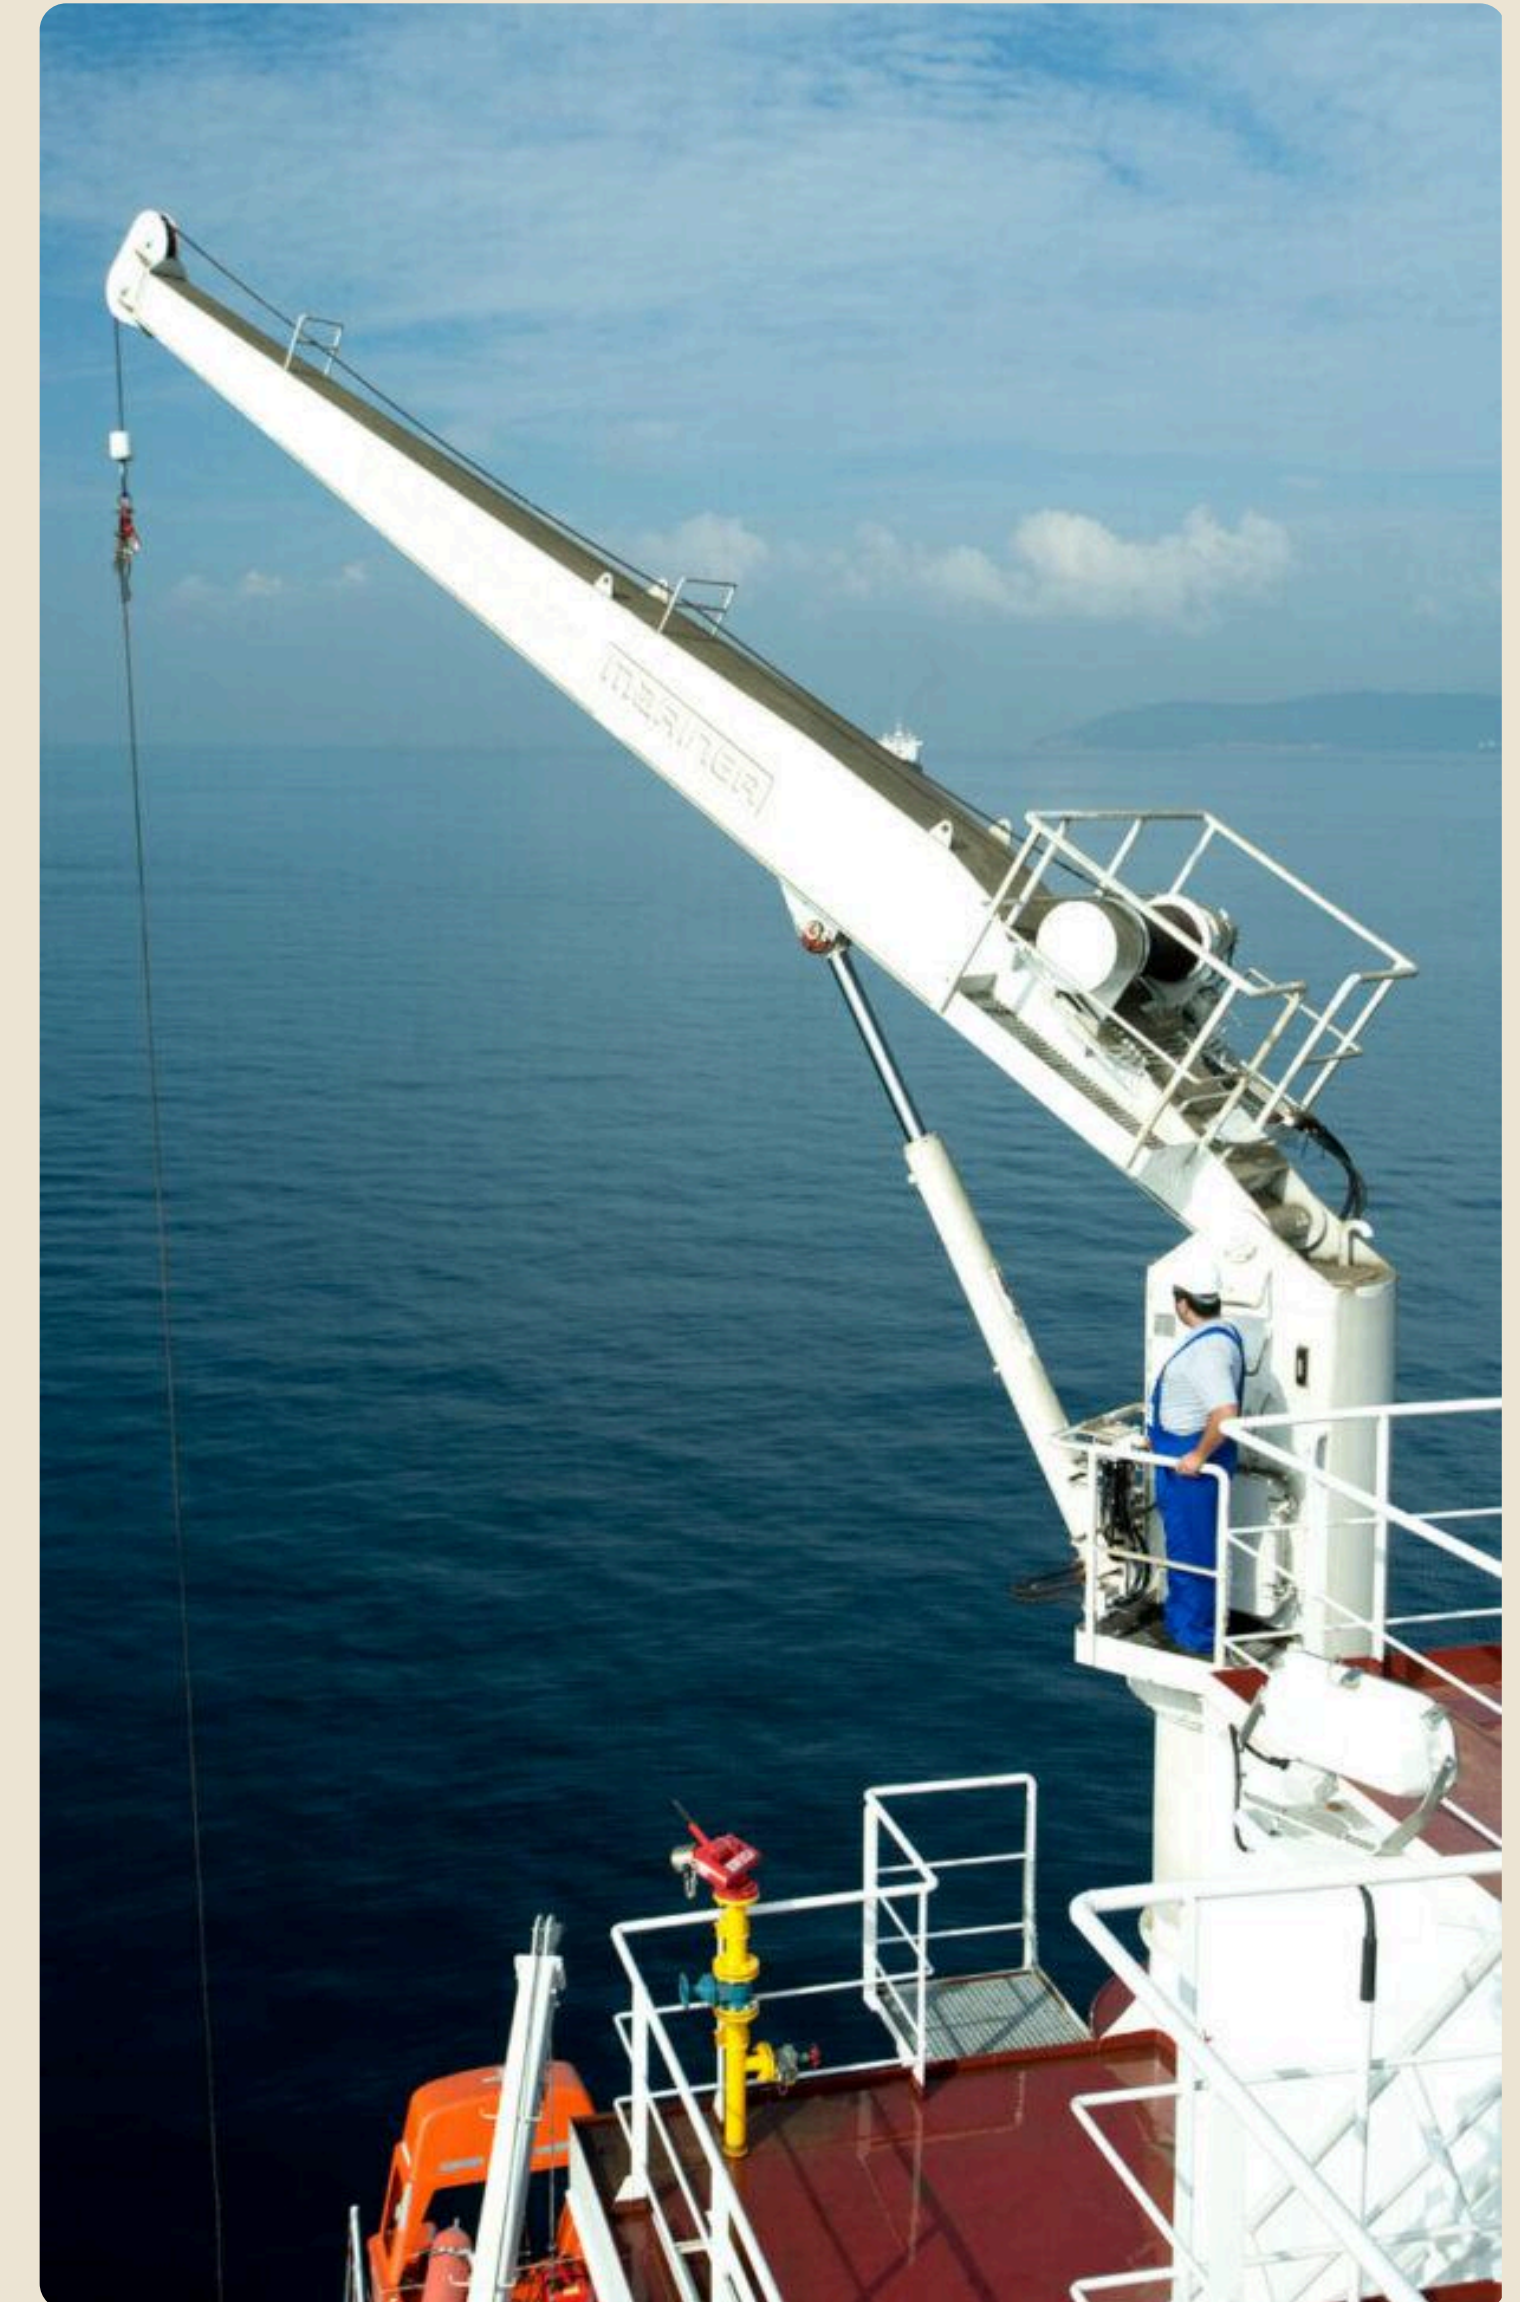

In addition to above deck cranes such as gantry, knuckle boom, service/provision/hose, davit/rescue/A-frame, and telescopic type cranes, Mariner has also designed various types of below deck bridge cranes.

Ex-proof cranes for both commercial and military use are also within Mariner's scope of experience.

SERVICE

Winches

[DESIGN](#)[PRODUCT](#)[SERVICE](#)

Mariner is known for its durable winches that defy the test of time and sea conditions. All types can be either hydraulic or electric driven. The types of winches currently offered by Mariner are: combined anchor & mooring winches, anchor winches, mooring winches (that can be self-tensioned), towing winches, tugger winches, capstans and various other kinds for fishing vessels.

Hatch Covers

In accordance with the demands of the shipowner and the task of the vessel, Mariner provides various solutions for hatch covers. Mariner hatch designs above deck can be multi-folding, double-folding, gantry crane operated pontoon, external crane operated pontoon or piggy back type. Below deck, we offer tween-deck and grain bulkhead solutions.

Ro-ro Equipment and Marine Access Systems

DESIGN

PRODUCT

SERVICE

According to demand, Mariner can design stern/bow/side and tilting ramps, side, stern, ROV hangar and pilot doors, and various other solutions for commercial and military use.

Service

On site. Anywhere you need us.

A grayscale photograph of a ship's deck. In the foreground, a large crane arm is visible with the text "SWL 4T 3.9 m" and "MARINER" on it. Below the crane, a group of five service engineers wearing hard hats and safety vests are standing and looking at a clipboard. In the background, a large inflatable boat is being hoisted by the crane. The overall scene is industrial and maritime.

WORLDWIDE SERVICE ENGINEERING

Our reliable and robust team of service engineers are with you 24/7.

Mariner provides global service and support for all its products. Our service engineers are located both in Istanbul, Turkey and in Hamburg, Germany.

**If you are looking for tailor
made, reliable and durable
equipment, contact us.**
